Transforming data to transform lives for the better. That's real-world care.

Our multi-source, multi-faceted clinical genomic database provides comprehensive, real-world data to accelerate the development of urgently-needed therapies, and increased understanding of treatment patterns, outcomes, and much more.

How does our data support real-world care?

Biopsy found PD-L1 and KRAS-G12C

Brain metasis, surgery to insert shunt

Diagnosis of NSCLC and ongoing labs

ER visit for persistent headaches

Ongoing systemic therapy due to no systemic therapies on the market for PD-L1 or KRAS-G12C

'Non-smoker'

Last contact, 28 months post diagnosis

Chronic sinusitis

Syapse's Real-World Care Solutions – Data Intelligence, Insight Analytics and Applied Experience – are powered by the Learning Health Network of multidisciplinary community health systems that share their data containing the complete patient journey. Allowing Syapse to generate robust insights for life sciences.

How we deliver value to life sciences

Applied Experience.

Quality improvement. Enabling strategic collaborations between life sciences companies and health systems to improve the quality of care using The Syapse Care Impact Model.

Insight Analytics.

Insights at your fingertips. Using JuptyerLab, develop your own code and analytics combined with our comprehensive real-world dataset for deeper insights and tailored analyses.

Point and click tools. Rapidly understand testing patterns, patient characteristics and clinical outcomes.

Data Intelligence.

Confidence in patient- and record-level completeness. In a recent TNBC study, Syapse was able to achieve 98% race completeness v. 75% (as compared to other real-world data companies).

Regulatory collaborations.

Confidence in hypothesis generation and regulatory submissions. Ability to use the same data source for regulatory submissions and highly customizes research studies (e.g., feasibility studies).

Real-world impact through real-world data.
